# IAPR/ICDAR Award

I would like to Dedicate this award to

**My 70+ Students**

Who Performed Much of the  
Research I am Recognized for  
Over the Past 35 Years

# Thank You

## Some of those who made it all possible

*Computer Vision and Pattern Recognition Laboratory*

# Representing them all here is Sameer Antani, Ph.D.

**Sameer Antani: *Video Content Characterization via Robust Recognition of Scene and Caption Text*, Ph.D., 2001**

# IAPR Leaders, Freeman, Fu, Sakai, and Pavlidis at First Meeting of the IAPR Governing Board, Kyoto, 1978

# What is Graphics Recognition?

## A Typical Document: Three Components

**Text Regions - Recognized by OCR**

**Images - Processed by Image Processing**

**Graphics- Analyzed by Graphics Recognition**

**Graphics include Block Diagram, Chart, Graph, Line Art, Map, Schematic, Table, etc.**

Locate all left edge points.

Yields lower inside corner points on left edge (see point labelled (10) in Fig. 7(a)). At this point the accumulators contain all vertical edges facing left which start from inside corner points as described in 10) above.

**Joined the Pennsylvania State University**  
**Had to find a new topic for my research**

**Always interested in MAPS**

Image Analysis Techniques for Cartographic Data Processing

TECHNICAL ABSTRACT (LIMIT TO 22 PICA OR 18 ELITE TYPEWRITTEN LINES)

The objective(s) of this project is (are):

Design an intelligent computer based system to "understand" and extract information from cartographic data and answer queries related to spatial features and structure of geographical data. Image analysis techniques such as region growing, line tracking and representation using conic arcs and edge

**Proposal submitted in January 1983; Grant for \$48,000**  
**Received from National Science Foundation in April 1983**  
**Finally, started working in Graphics Recognition!**

# Some Results from Map Analysis project (1983-87)

# General Purpose Graphics Recognition Project

## After Text Separation

# General Purpose Graphics Recognition Project

## Dashed Line Detection Algorithm

(a)

(b)

While there is a segment,  $L$ , which is not used in any line or tested for starting a new line, Do

- 1: Select the "Head" end of Segment  $L$  by setting Terminal = 1
  - 2: Let  $S_0 = L$  and  $t_0 = \text{Terminal}$
  - 3: Select an unmarked segment  $S_1$  having the highest priority to continue the line at  $t_0$  end of  $S_0$   
 If  $S_1$  exists, then  
 Mark  $S_1$ . Locate the other end of  $S_1$ . If it is a head, then set  $t_1 = 1$  else set  $t_1 = 2$   
 Go to Step 4  
 elseif Terminal = 1 then  
 Terminal = 2  
 Go to Step 2 (to extend the line at the other end of starting segment  $L$ )  
 else  
 Label all the segments which belong to the current line  
 Clear all marks of segments which are not part of a dashed line  
 Continue to find other lines (by returning to the While loop)  
 end if
  - 4: Select an unmarked segment  $S_2$  having the highest priority to continue the line at  $t_1$  end of  $S_1$ .  
 If  $S_2$  exists, then  
 Mark  $S_2$   
 If  $l_{s_0} \neq l_{s_2}$  Or  $g_{s_0} \neq g_{s_2}$  then Go to Step 4  
 Locate the other end of  $S_2$ . If it is a head, then set  $t_2 = 1$  else set  $t_2 = 2$   
 Go to Step 5  
 else  
 Go to Step 3  
 end if
  - 5: Select an unmarked segment  $S_3$  having the highest priority to continue the line at  $t_2$  end of  $S_2$   
 If  $S_3$  exists, then  
 Mark  $S_3$   
 If  $l_{s_1} \neq l_{s_3}$  Or  $g_{s_1} \neq g_{s_3}$  then Go to Step 5.  
 Locate the other end of  $S_3$ . If it is a head, then set  $t_3 = 1$  else set  $t_3 = 2$   
 Label  $S_1$  and  $S_2$  as extensions of current line. Set  $S_0 = S_2$ ,  $t_0 = t_2$ ,  $S_1 = S_3$ , and  $t_1 = t_3$ .  
 end if
  - 6: Go to Step 4
- end while

## ARTICLES

### 5 Guest Editors' Introduction: Document Image Analysis Systems

*Lawrence O'Gorman and Ranveer Kasturi*

### 10 A Prototype Document Image Analysis System for Technical Journals

*George Nagy, Sharad Seth, and Mahesh Viswanathan*

Intelligent document segmentation can bring electronic browsing within the reach of most users. The authors show how this is achieved through document processing, analysis, and parsing the graphic sentence.

### 25 An Interpretation System for Land Register Maps

*Luca Boatto, Vincenzo Consorti, Monica Dei Buono, Silvio Di Zeno, Vincenzo Eramo, Alessandra Esposito, Francesco Melcarne, Marco Meacci, Andrea Morelli, Marco Mosciatti, Stefano Scarci, and Marco Tucci*

The semantics of land register maps drive this document conversion system. However, its methods of image representation, vectorization, and symbol recognition can be generalized to other classes of line drawings.

### 34 Postal Address Block Location in Real Time

*Paul W. Palumbo, Sargur N. Srihari, Jung Soh, Ramalingam Sridhar, and Victor Denjanenko*

A postal automation system locates destination address blocks on letter mail pieces with a high success rate. Pipelining and multiprocessor techniques achieve real-time processing speed.

### 46 Celesstin: CAD Conversion of Mechanical Drawings

*Pascal Vaxivière and Karl Tombré*

A prototype CAD conversion system extracts higher level structures for knowledge-based analysis. It recognizes such entities as screws, ball bearings, and shafts.

## PROJECT OVERVIEWS

### 56 A Robust Recognition System for a Drawing Superimposed on a Map

*Shigeoyoshi Shimotsuji, Osamu Hori, Mieko Asano, Kaoru Suzuki, Fumihiko Hoshino, and Toshiaki Ishii*

### 59 Reading Handwritten Digits: A ZIP Code Recognition System

*Ofer Matan, Henry S. Baird, Jane Bromley, Christopher J.C. Burges, John S. Denker, Lawrence D. Jackel, Yann Le Cun, Edwin P.D. Pednault, William D. Satterfield, Charles E. Stenard, and Timothy J. Thompson*

### 63 From Paper to Office Document Standard Representation

*Andreas Dengel, Rainer Bleisinger, Rainer Hoch, Frank Fein, and Frank Hönes*

### 67 DRS: A Workstation-Based Document Recognition System for Text Entry

*Tomio Amano, Akio Yamashita, Nobuyasu Itoh, Yoshinao Kobayashi, Shin Katoh, Kazuharu Toyokawa, and Hiroyasu Takahashi*

### 71 Off-Line Arabic Character Recognition

*Habib Goraine, Mike Usher, and Samir Al-Emami*

### 75 Understanding Diagrams in Technical Documents

*Robert P. Futrelle, Ioannis A. Kakadiaris, Jeff Alexander, Catherine M. Carriero, Niko Nikolakis, and Joseph M. Futrelle*

## Contents

- 141 Introduction: Document Image Analysis Techniques  
Rangachar Kasturi and Lawrence O'Gorman
- 143 Intelligent Forms Processing System  
Richard Casey, David Ferguson, K. Mohiuddin, and Eugene Walach
- 157 A Computational Model for Recognition of Multifont Word Images  
Tin Kam Ho, Jonathan J. Hull, and Sargur N. Srihari
- 169 Text Segmentation Using Gabor Filters for Automatic Document Processing  
Anil K. Jain and Sushil Bhattacharjee
- 185 Thinning and Segmenting Handwritten Characters by Line Following  
Claude Chouinard and Réjean Plamondon
- 199 Segmentation-Recognition Algorithm for Zip Code Field Recognition  
F. Kimura and M. Shridhar
- 211 Extraction of Data from Preprinted Forms  
Suzanne Liebowitz Taylor, Richard Fritzon, and Jon A. Pastor
- 223 Segmentation and Preliminary Recognition of Madrigals Notated in White Mensural Notation  
Nicholas P. Carter
- 231 Document Image Analysis: A Bibliography  
Rangachar Kasturi and Lawrence O'Gorman
- 244 About the Authors
- 247 Erratum
- 248 Announcements

Springer International

*Proceedings of the Second*  
**International Conference on Document  
Analysis and Recognition**

October 20 – 22, 1993

Tsukuba Science City, Japan

*Sponsored by the IAPR TC-11, TC-10*

 IEEE Computer Society Press

 The Institute of Electrical and Electronics Engineers, Inc.

**Organized by Kazuhiko Yamamoto**

# Next Three: Montreal, 1995; Ulm 1997; and Bangalore, 1999

S.N. Srihari and R. Kasturi (General Chairs)

# Graphics Recognition – Recent Progress 1995 - Present

**First International Workshop on Graphics Recognition  
August 9-11, 1995  
Pennsylvania USA**

**Session Topics**

- **Basic Techniques and Symbol-level Recognition**
- **Map Processing**
- **Engineering Drawings**
- **Applications of Graphics Recognition**
- **Performance Evaluation**

**Dashed Line Detection Contest**

# GRec Contests

- 1995: Dashed Line Detection
- 1997: Raster to Vector Conversion
- 2001: Arc Segmentation
- 2003: Symbol Recognition
- 2005: Symbol Recognition II
- 2007: Symbol Recognition III
- 2009: Arc Segmentation II
- 2011: Isolated Symbol Recognition and Symbol Spotting
- 2013: Music Scores Competition: Staff Removal
- 2013: Arc and Line Segmentation
- 2015: Engineering Drawing Challenge I
- 2017: Engineering Drawing Challenge II

# GRec 1995 State College Pennsylvania

Dov Dori receiving Dashed Line Detection Award  
(Winning Team: D. Dori, L. Wenyin and M. Peleg)

Proceedings of the  
8<sup>th</sup> IAPR International Workshop on Document Analysis Systems

September 16-19, 2008  
Nara Prefectural New Public Hall, Nara, Japan

---

Editors: Koichi Kise and Hiroshi Sako

# International Journal on Document Analysis and Recognition

**Begins Publication in 1998**

**Current Editors-in-Chief: K. Kise; D. Lopresti; S. Marinai**  
**Founding Managing Editor: David Doermann**

*Computer Vision and Pattern Recognition Laboratory*

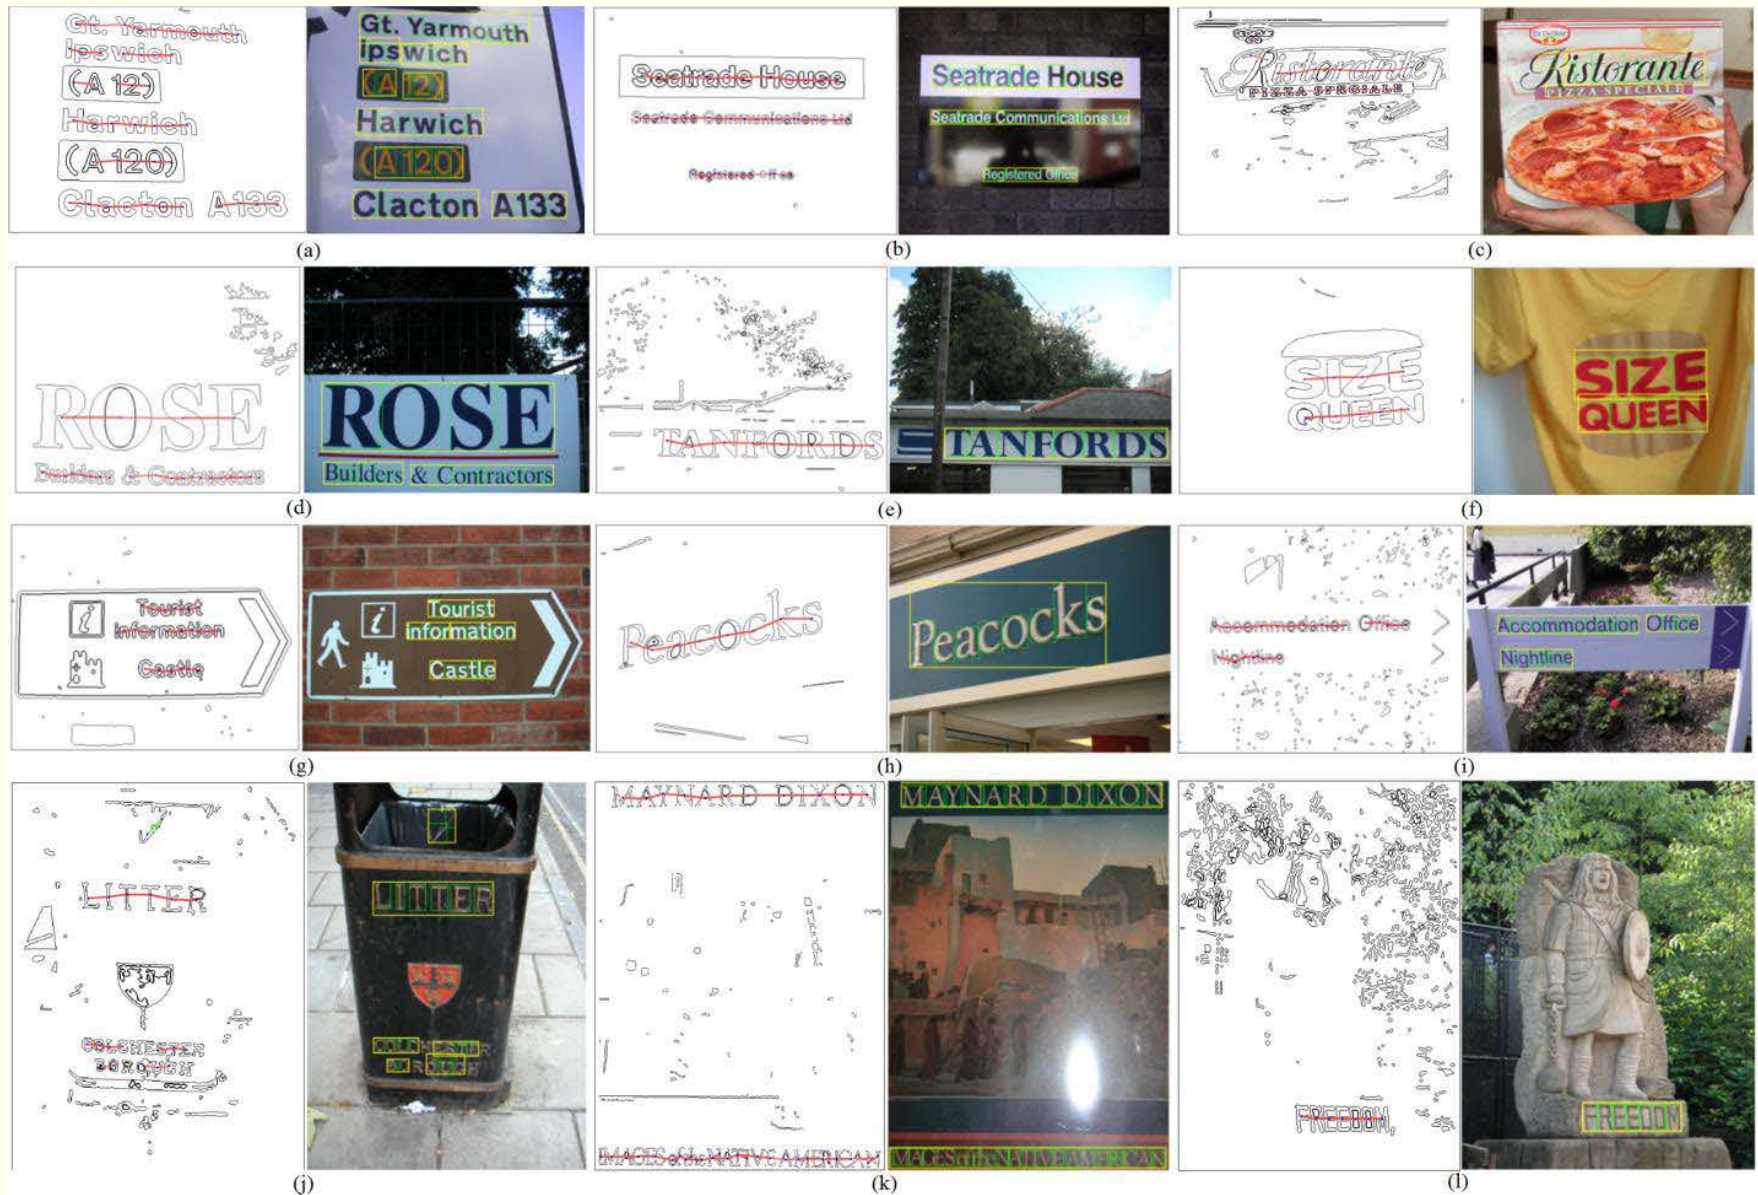

# New Workshop on Camera-Based Document Analysis and Recognition since 2005

# Text Detection in Video/Images: An Example

J. Zhang and R. Kasturi, CBDAR 2013 and IEEE TIP 2014

Results on 2003-05 ICDAR Dataset

# GreC 1995 to 2017

## ■ GREC 2017, Kyoto

- 27 papers organized into 6 sessions
- Interpretation of engineering drawings, maps, charts, etc.
- Symbol Recognition and Spotting
- Optical Music Recognition
- Interpretation of drawings, music scores, tables, etc.
- Raster to Vector and drawings
- Performance Evaluation and Interpretation
- Engineering Drawing Challenge II

## ■ GREC 1995, State College, Pennsylvania

- Basic Techniques and Symbol-level Recognition
- Map Processing
- Engineering Drawings
- Applications of Graphics Recognition
- Performance Evaluation

# Graphics Recognition Today

- Some 250 papers on GR Topics since 2007
- Fewer papers in Raster to Vector Conversion, Map Analysis, Tables, etc.
- Continuing interest in **Music Recognition** and **Historical Document Analysis**
- Increased interest in analyzing natural **Video/Image** data captured by cameras
- Much Interest: **Sketch or Example-driven Recognition (SIGGRAPH/EuroGraphics, Multimedia and CBIR Communities are Ahead of us).**

# Historical Documents: An Example From U.S. National Archives

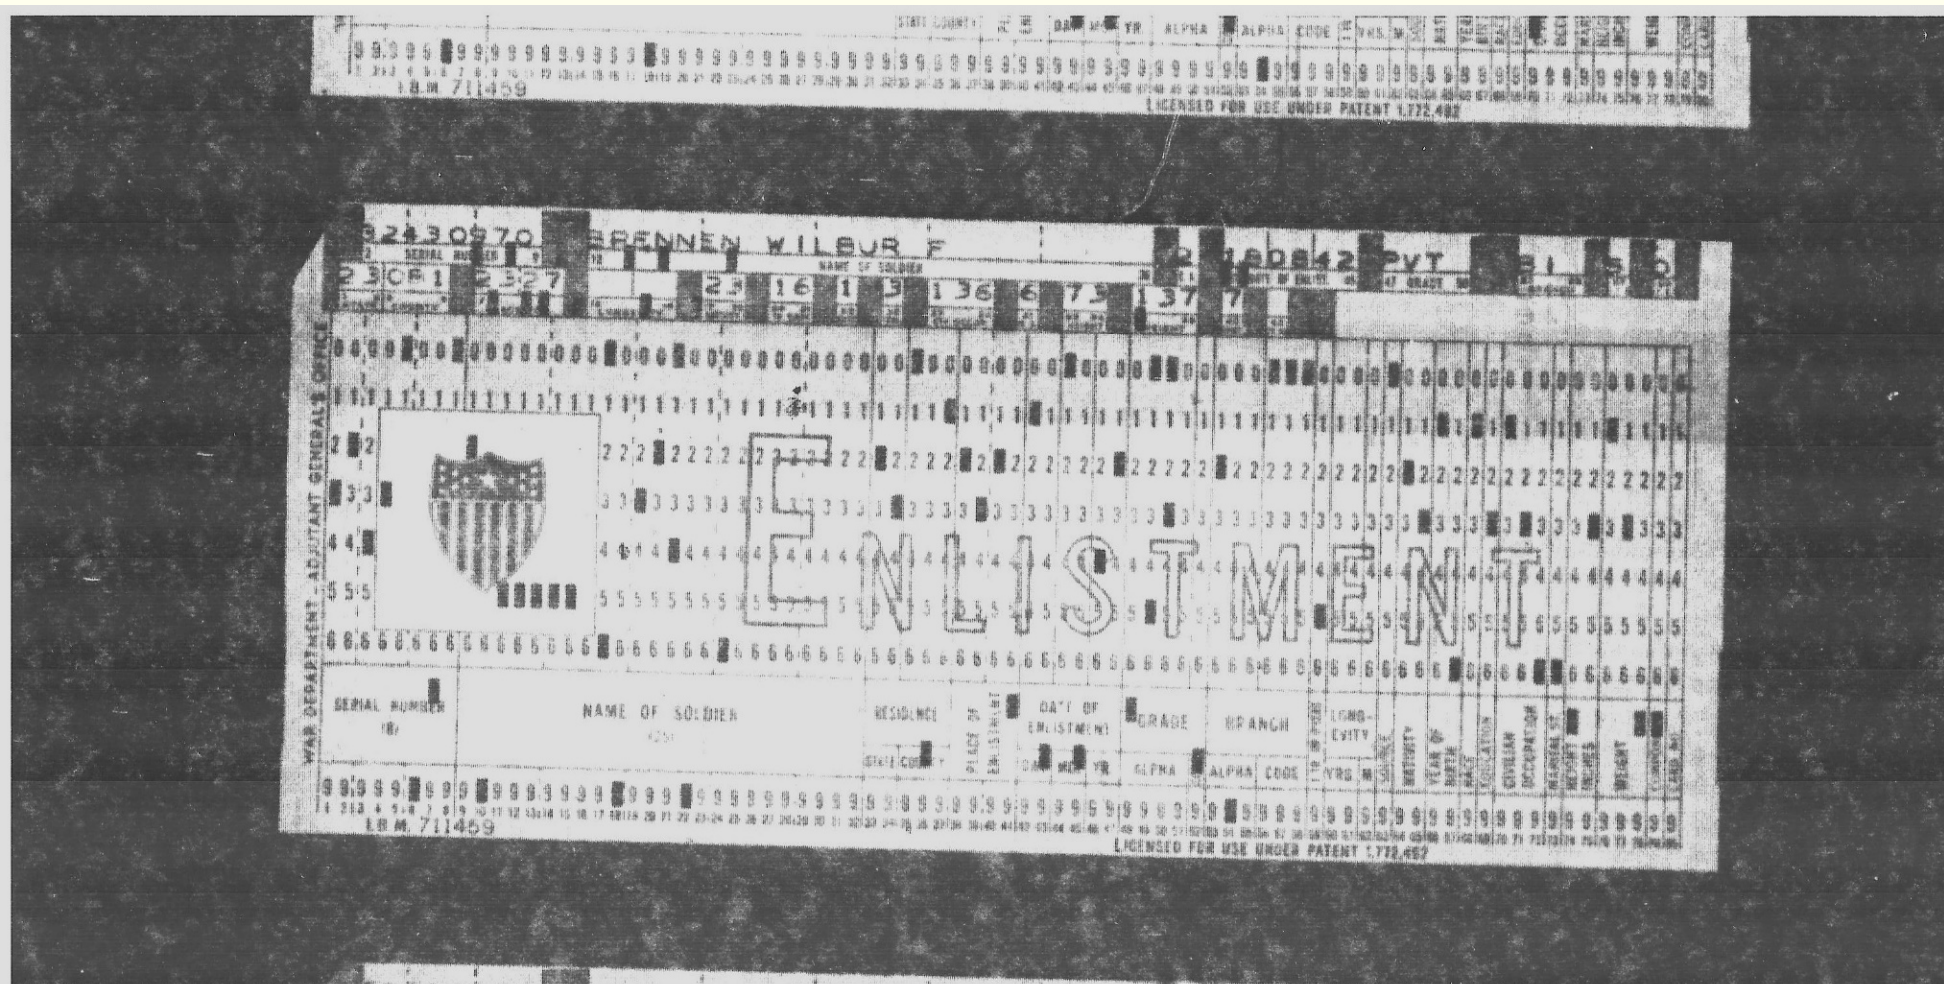

# Historical Documents: One Example

# Text from Microfilm Images of Punched Cards

## An Example of Historical Document Processing

# One Final Thought:

## Do we need an Open GR?

- We have seen the impact of Open CV in accelerating Computer Vision research.
- But most Graphics Recognition applications appears to be still built from scratch.
- Should we invest in developing an **Open GR**?
  - Perhaps contribute to adding Graphics Recognition tools to Open CV?
  - Build upon Other Initiatives such as Aletheia?
